

TOGAHACKS

SPONSORSHIP PACKAGE

MARCH 12-13, 2018

20300 HERRIMAN AVENUE | SARATOGA HIGH SCHOOL

ABOUT US:

We are a group of high school students studying at Saratoga high school, who all share a mutual interest in the field of computer science. Wanting to share this with the rest of the student body and the surrounding high schools as well, we think that hosting a hackathon will be the best way to introduce people to this sometimes intimidating field.

LOGISTICS:

TogaHacks will host approximately 200-250 high school students from all across the bay area, all of whom have various skill levels in computer science and art fields. The event will be hosted at Saratoga high school, which is located at 20300 Herriman Avenue. It will be held from March 12th to March 13th 2018 in various parts of the campus from 9:00 AM PST to 6:00 PM PST.

WHY SPONSOR?

TogaHacks aims to inspire those that are interested in the field of computer science. By sponsoring our event, you and your companies can help spark the next generation of computer scientists, fostering the attendees and helping them become more skilled in the computer science field. In addition, it also allows companies to explore additional possibilities thought of by a third party perspective for their APIs and developer tools.

HOW CAN YOU HELP?

1. Bring a developer or staff member to the event!
2. Donate money directly to the TogaHacks team, allowing us to accommodate to all needs of the hackathon and the hackers that attend.
3. Sponsor one of the five meals that will be served during the hackathon
4. Sponsor a game or event, to spread the presence of your company, its culture, and its goals, and to give hackers a break between intense coding sessions.
5. Bring promotional material such as t-shirts, stickers, snapbacks, or sweatshirts which can spread the popularity of your brand among the attendees.
